

 **Jama connect® Licensing**

Jama Connect® is a hub for understanding your complete product development lifecycle, enabling product managers, systems engineers, and business analysts to track requirements, decisions, and relationships on multiple levels

Jama Connect's license model is fully scalable, ensuring rapid deployment and easy adoption of the solution across your product development team. The base package includes the full breadth of Jama Connect's core capabilities with access for up to 10 named Creators, and site licenses for Stakeholders and Reviewers — enough to get your product organization up and running with our industry-leading solution.

The Jama Connect base package allows flexibility to include a range of Creator licenses, such as:

- **10 named Creator licenses (or an equivalent mix of named and floating Creators)**
- **Alternative example: 1 named and 3 floating Creator licenses**

Note: Three named Creator licenses can be exchanged for one floating Creator license.

The base package can easily be extended to allow access for the entire enterprise. Jama Connect is available as either a cloud or self-hosted deployment option, and is based on an annual subscription. Jama Connect does not require client-side software to be installed.

JAMA CONNECT BASE PACKAGE INCLUDES:

- **Jama Connect platform**
- **Access for up to 10 named Creators**
- **Unlimited Stakeholder and Reviewer access**
- **Secure SaaS hosting**
- **24 x 7 support**
- **Non-production-hosted sandbox**
- **Access to Jama Connect REST API**

Jama Success Programs provide an adoption-oriented approach, designed for how your teams work. The training offerings—available from self-service tutorials to bespoke private training—are designed to help you align your people, processes, and data to maximize your development success. Because everyone requires clarity on what your teams are building and why, Jama Connect offers four unique license types to suit different user roles and promote deep collaboration and alignment across your organization.

Creator

Full access to author, edit, and manage all the requirements, data, and workflows in Jama Connect, including the complete review and approval cycle, as well as test management. Creators are usually product managers or owners, business analysts, systems engineers, project managers, or quality assurance engineers.

Stakeholder

Read access for viewing context, engaging in real-time decisions, and capturing critical feedback in order to stay informed and in sync. Stakeholders may include executive managers, quality and development engineers, customers, or business users.

Test Runner

The ability to write/edit test plans, execute test runs, and log defects. This seat is targeted at roles focused heavily on verification and validation who need the ability to run test plans efficiently but will not have the ability to create test cases like a Creator.

Reviewer

Participate in formal review and approval workflows to provide input, view feedback, and digitally sign off on work. Reviewers are typically executive managers, customers, or other ad-hoc stakeholder.

Jama Software® is focused on maximizing innovation success in multidisciplinary engineering organizations. Numerous firsts for humanity in fields such as fuel cells, electrification, space, software-defined vehicles, surgical robotics, and more all rely on Jama Connect® requirements management software to minimize the risk of defects, rework, cost overruns, and recalls. Using Jama Connect, engineering organizations can now intelligently manage the development process by leveraging Live Traceability™ across best-of-breed tools to measurably improve outcomes. Our rapidly growing customer base spans the automotive, medical device, life sciences, semiconductor, aerospace & defense, industrial manufacturing, consumer electronics, financial services, and insurance industries.
